

Tentij Instruments introduces the ORB MK1

**The Wurlitzer extension,
Wurlitzer never made.**

No samples. No computers, just mechanics.

The ORB MK1 is a two-octave bass piano built around a fully analog, mechanical design, bringing the warm, unmistakable character of a Wurlitzer into the bass register.

The ORB MK1 features full hammer-action keys, giving you precise, expressive control over every note.

Each key on the ORB strikes a carbon-fiber reed, producing the warm, unmistakable Wurli sound we all know, and love.

Each reed is detected by an infrared sensor, delivering a high-resolution, low-noise output.

Underneath the piano, 25 tuning sliders let you tune each reed individually, without opening the instrument.
